

What you can do at fuha: TOKYO

Customer satisfaction above **90%**

Get to know about products

It's hard to understand the differences in features and functions of individual products.

You can check the installation images, as well as the sizes, colors, and functions of the products.

Ask our trained staff

What's the best location for the air-conditioner?

You can consult with our trained staff about the best product for your needs and the ideal location for installation.

Consultation about air-conditioners Appointment required

IN-PERSON
Scan to make an appointment.

Limited-offer designs

The Art Line

by HERALBONY

Designs created in collaboration with HERALBONY, a creative company developing new culture with brilliant artists, are also exhibited.

The Art Line

The Art Line is a brand for people who seek both comfort and stylish designs. With a wide selection of 57 designs, the Art Line offers you the opportunity to explore textures that best suit your needs.

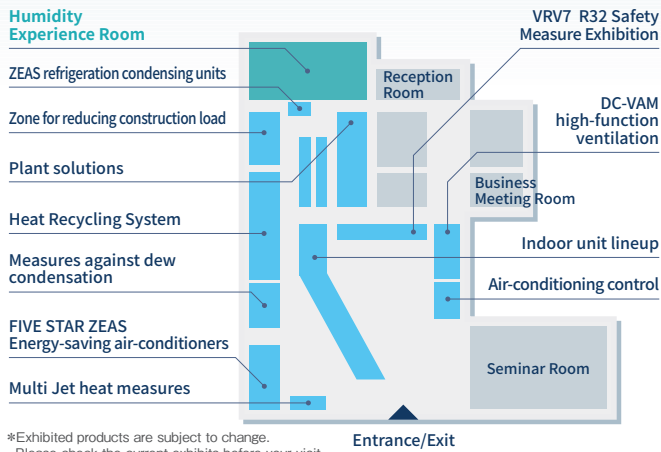

Official The Art Line Website

<https://www.ac.daikin.co.jp/theartline>

Business Zone

The Business Zone exhibits a wide range of business-use products that satisfy needs for air-conditioning systems in stores, offices, plants, and buildings. Our staff will help solve various problems related to electricity costs, working environments, operating methods, and labor shortages.

Business-use room air-conditioner lineup

A wide variety of DAIKIN indoor unit series is exhibited. Check their actual designs, sizes, and operations.

FIVE STAR ZEAS Energy-saving air-conditioners

Using a touch panel, our staff explain the characteristics of FIVE STAR ZEAS, the energy-saving model product series, and flat-rate purchase.

Multi Jet

Experience large air-flow volume designed to improve the thermal environment of large spaces such as factories, warehouses, and gymnasiums.

Condensation prevention measures for ceilings and products

Introduction and demonstrations of the mechanisms and countermeasures for condensation in the space above the ceiling as well as unique countermeasure products designed to prevent condensation on the air conditioner unit itself.

VRV7 R32 Safety Measure Exhibition

Check the characteristics of and safety measures for business-use multi-type air-conditioners corresponding to R32 refrigerant, using the actual products.

Heat Recycling System

A new ventilation system designed to reuse waste heat is on display. The system is demonstrated with LEDs showing the heat flow.

Air-conditioners for equipment

This section exhibits air-conditioners designed to solve a wide range of problems at plants and operate in demanding environments. You can actually experience the powerful airflow.

Lineup of components and materials that reduce construction load

A wide variety of DAIKIN components and materials that reduce on-site construction load is exhibited. Explore DAIKIN product series that respond to labor shortages and construction quality challenges.

*Exhibited products are subject to change. Please check the current exhibits before your visit.
